Dear Advance CTE Members, Partners and Friends:

We initially imagined 2020 as a year of celebration as Advance CTE achieved a milestone of 100 years as an organization. While it was not the year any of us imagined, I am grateful that we united to continue to advance the work that has guided us for a century: supporting State Career Technical Education (CTE) Directors and leaders to transform and expand CTE to provide a high-quality pathway to career success for each learner.

In a year of crisis that challenged our education and workforce systems, the nation’s economy, our nation’s health care system and our organization, we re-examined our member supports and intentionally doubled down on our most significant priority: serving you — our members.

This report highlights the many ways we put service to our members at the forefront to not only continue CTE programs during a global pandemic but also apply lessons learned to advance solutions for strategic evergreen and time-sensitive topics, including racial equity, data quality, and positioning CTE to lead a national recovery.

I could not be prouder of the resilience of our staff and members over this past year. In the face of finalizing your state Perkins plans, responding to COVID–19 and its ravages on our nation’s education system, and a national reckoning on racial injustice, you showed up. You made the time to attend Advance CTE virtual events. You supported one another as peers, colleagues and friends; you listened, learned and took action. 2020 reminded us all of what matters. The work we do matters. You matter. I hope this report is an uplifting reminder of what is possible when we work together and leaves us with a sense of shared accomplishment and resolute commitment to continue to lead with equity and quality at the forefront!

With gratitude,
Kimberly Green

ABOUT ADVANCE CTE

Advance CTE: State Leaders Connecting Learning to Work, first established in 1920, is the longest-standing national non-profit that represents State CTE Directors and state leaders responsible for secondary, postsecondary and adult CTE across all 50 states, the District of Columbia and U.S. territories.

Advance CTE’s mission is to support visionary state leadership, cultivate best practices, and speak with a collective voice to advance high-quality CTE policies, programs and pathways that ensure career success for each learner, and our vision is to transform and expand CTE so that each learner — of any background, age and zip code — is prepared for career and college success through state leadership, advocacy and partnerships.
In 2020, Advance CTE celebrated our 100–year history of service to our members. Over the course of that history, how we support our members has changed, adapting and responding to technology, the policy environment, and the needs of our members. While the nation faced unprecedented challenges brought about by COVID–19, our commitment to supporting our members was steadfast, adapting to meet the evolving needs this year presented, including the pivot to virtual delivery of high-quality CTE and a massive economic downturn that left millions of Americans unemployed.

Supporting Members through COVID–19

Advance CTE went into action to support state CTE leaders and our members through this difficult and tumultuous time, creating spaces and opportunities for our members to learn and connect in new ways. After our world turned virtual in March 2020, Advance CTE quickly launched a multi-month virtual learning series that included webinars for all members; lunch and learn conversations for our state members on top-of-mind topics, including supporting learners during the pandemic and digital delivery of work-based learning experiences; and regionally based networking video calls for State CTE Directors. These events allowed our members across the country to work collaboratively in real time through the day’s most pressing and ever-changing hurdles.

To support our members through the short-term crisis and long-term challenges, Advance CTE created a new web page housing materials relevant to CTE and COVID–19 (coronavirus). Advance CTE also released resources, including COVID–19’s Impact on CTE: Defining the Challenge and the Opportunity, which identifies the unique challenges that COVID–19 presented to CTE during the pandemic and beyond; Prioritizing CTE Through and Beyond COVID–19, a tool for state CTE leaders to leverage when planning for short- and long-term priorities; and our Reopening Tracking and Analysis, which analyzed school reopening plans and their direct connection to CTE.

Connecting New State CTE Directors to Resources and Each Other

Ten states welcomed new leaders as State CTE Directors in 2020, with most of them taking advantage of the revamped New State Director Institute to support them in their new role. This fully virtual program pairs new State Directors with seasoned mentors for monthly check-ins and brings participants together for multi-hour, deep-dive workshops on key topics, including strengths-based leadership, program quality, and equity and access in CTE.
IN ADDITION TO CORONAVIRUS-SPECIFIC RESOURCES, ADVANCE CTE RELEASED A NUMBER OF MATERIALS ON KEY TOPICS, INCLUDING MIDDLE GRADES CTE, DATA, HOW TO COMMUNICATE ABOUT CTE, YOUTH APPRENTICESHIP AND MORE.
Advance CTE built places and spaces for connection between and among our members, CTE stakeholders, and our partners and other leaders in the CTE community. Advance CTE is grateful for our nearly 70 partner organizations, which help expand our reach and impact and work with us to ensure that CTE is fully connected to all facets of our education and workforce systems.

Advancing CTE through Strong Partnerships

In 2020, Advance CTE led three Shared Solutions Workgroups, bringing together national, state and local leaders to identify and co-develop the resources the CTE field most needs to move CTE forward. These workgroups — which focused on expanding middle grades CTE, improving CTE data visualization and reporting, and advancing career readiness data quality and use — collectively brought together leaders from across 23 states and 20 partner organizations and resulted in a wide array of resources, tools and supports to advance high-quality and equitable CTE. These workgroups were convened with resources from the Bill & Melinda Gates Foundation, JPMorgan Chase & Co. and ECMC Foundation.

Advance CTE regularly engages our members to inform and shape our organizational priorities. During 2020, Advance CTE organized four state-level, members-only kitchen cabinets on equity in CTE, CTE and the economic recovery, the Workforce Innovation and Opportunity Act, and the revision of the National Career Clusters® Framework. In total, 34 states participated in one or more of these kitchen cabinets to provide invaluable input on Advance CTE’s priorities and member supports.
Looking Toward the Future of CTE

In September, Advance CTE hosted CTE Forward: A Summit on CTE’s Impact & Promise in partnership with nine co-convening organizations. This virtual event brought together approximately 200 state, national and local leaders representing education, workforce development, industry, and the philanthropic and research communities with the goal of gathering broad perspectives and ideas that would inform a new vision for CTE. Over the course of two days, the Summit contributors engaged in multiple rounds of interactive discussions focusing on the major disruptions to CTE and our foundational commitments to and desired outcomes for CTE in the future. Advance CTE documented each contribution made throughout the Summit and is transforming them into a cohesive and forward-thinking new vision for the future of CTE, which will be released in March 2021.
Advance CTE documented each contribution made throughout the Summit and is transforming them into a cohesive and forward-thinking new vision for the future of CTE, which will be released in March 2021.
As disruptions and inequities mounted throughout the year, Advance CTE continued to advocate for and position CTE as vital to learners, communities, employers and the nation’s economy.

**CTE’s Vital Role in Economic Recovery**

As our nation’s economy faced historic levels of unemployment — particularly for Black and Latinx people, those without a high school diploma and women — and transformational realignments in education and industry, Advance CTE launched a series of activities to position CTE as critical to economic recovery. Advance CTE launched a kitchen cabinet to bring together national organizations and our members around this important topic, held webinars and lunch and learn on CTE’s role in upskilling and reskilling and the future of work, and developed a number of assets. Members were provided factsheets and a marketing toolkit with messaging, data, and strategies to communicate with policymakers on how investment in secondary and postsecondary CTE is vital to a sustainable economic recovery. Advance CTE also created a messaging video, *Career Technical Education’s Vital Role in Economic Recovery*, to communicate the importance of CTE to policy-makers, key stakeholders and the general public.

**Federal Policy and Advocacy**

A definitive bright spot in 2020 was the largest proposed federal funding increase for CTE — $900 million — in history. As the year progressed, Advance CTE shifted our federal advocacy to focus on the needs of the CTE community in new federal stimulus funding and statutory waivers and flexibilities. The Coronavirus Aid Relief and Economic Security Act was passed and signed into law in March. It included $30.75 billion for an Education Stabilization Fund, with the Strengthening Career and Technical Education for the 21st Century Act (Perkins V) as an authorized use of funds.

Advance CTE worked closely with the U.S. Department of Education (USDE) and state CTE leaders as they sought to finalize and turn toward implementation of their Perkins V state plans. Advance CTE provided direct technical assistance to states while also serving as a bridge between states and USDE, advocating for increased flexibility due to coronavirus among additional customized supports.
As states navigated an uncertain year, they forged ahead in leading the CTE field by boldly implementing their Perkins V state plans, piloting innovative and impactful programs, and advancing CTE in their states.

**Boldly Implementing Perkins V**

Throughout the year, Advance CTE provided technical assistance and support to states as they finalized their Perkins V state plans and shifted to implementation. Specifically, Advance CTE provided in-depth technical assistance to seven states, including facilitating stakeholder engagement sessions and Perkins V plan development in Iowa; supporting California in the development of a common vision for CTE across federally and state-funded programs; assisting Illinois and New York in strengthening work-based learning; supporting Florida, Minnesota and Tennessee in identifying gaps around CTE program access and performance by special populations and subgroups; and supporting Florida in strengthening and sustaining stakeholder engagement efforts at both the state and local levels, with a focus on industry engagement, inter-agency coordination, and engaging representatives of special populations.

Advance CTE also conducted a comprehensive review of each state’s and the District of Columbia’s plans, resulting in The State of Career Technical Education: An Analysis of States’ Perkins V Priorities, the only 50-state analysis of Perkins V state plans. This report examines how states have leveraged the development of Perkins V state plans to advance the dual priorities of expanding quality and increasing equity within their CTE systems. It also reveals common aspects that are indicative of a robust and cohesive state plan, a number of which go beyond the law’s requirements and expectations. Further, Advance CTE built an interactive tool that allows users to compare aspects of the plans across states.

---

**States Are Going Above and Beyond the Requirements in Perkins V**

States are taking advantage of the flexibility in Perkins V,* climbing new heights to provide equitable, high-quality Career Technical Education (CTE).

- **20%** Requiring secondary concentrators to engage in more advanced coursework
- **31%** Focusing on equity within their program approval requirements
- **32%** Requiring or incentivizing secondary and postsecondary collaboration on the Comprehensive Local Needs Assessment
- **37%** Selecting more than one secondary program quality indicator
- **77%** Requiring more than the minimum of one program of study per local recipient

*Perkins V is the Strengthening Career and Technical Education for the 21st Century Act.
Advancing Youth Apprenticeships

As states and communities continue to expand the role of youth apprenticeship and its connection to CTE, Advance CTE backed this endeavor by leading a data workgroup, which met multiple times throughout 2020 to discuss challenges and opportunities for improving youth apprenticeship data quality. The group included representatives from state agencies, national partners and local intermediaries. In November, Advance CTE released a brief summarizing the workgroup discussions and making recommendations for state and local leaders. This work was supported with funding from the Partnership to Advance Youth Apprenticeship.

Preparing Youth for the Future of Work

New Skills ready network, an initiative of JPMorgan Chase & Co. and jointly led by Advance CTE and Education Strategy Group, was launched in 2020, providing five-year investments in six sites across the country: Boston, Massachusetts; Columbus, Ohio; Dallas, Texas; Denver, Colorado; Indianapolis, Indiana; and Nashville, Tennessee. Each site has formed new partnerships of local school systems, higher education, employers and state agencies and will leverage innovative new practices and policy solutions to improve student completion of high-quality career pathways and expand access to real-world work experience, higher education and good careers for under-served young people.

Improving Postsecondary CTE Data Quality

Four states — Alabama, Delaware, Florida and Oregon — and the District of Columbia were selected in a competitive grant process to participate in a new initiative aiming to improve equity and quality in postsecondary CTE programs by strengthening data ecosystems. This member-focused program, the Advancing Postsecondary CTE Data Quality Initiative, is a multi-state, multi-year effort equipping each state and the District of Columbia with funding and technical assistance to implement a strategic action plan. All states will benefit from this work as Advance CTE develops a suite of materials on the topic with funding from ECMC Foundation.
Throughout 2020, our nation grappled with long-standing racial inequities and injustices that could no longer hide beneath the surface. The education and workforce communities, including Advance CTE, had to wrestle with their responsibility, opportunity and ability to dismantle inequitable systems to provide the greatest opportunity for each learner.

_Committing to Internal Equity_

Advance CTE made an internal commitment to deepening organizational knowledge about the ways racial inequities and disparities present themselves in systems and structures and to understanding how to identify policies and practices that perpetuate those inequities. All staff took part in three workshops led by an external consultant to grow each staff member’s knowledge and competencies related to racial equity. This work, supported in part with funding from the Associated Black Charities, allowed Advance CTE to adjust a number of our policies and programs to work toward a more racially just organization. Additionally, the organization released our first statement ever on our commitment to ending racial injustice.

_Piloting Innovative Models to Identify Equity Gaps_

To build state capacity for identifying and understanding equity gaps in CTE, Advance CTE designed and piloted an opportunity gap analysis workshop program. Through the program, state and local leaders use their data to identify disproportionalities in enrollment across race/ethnicity, gender and special population status; conduct a root cause exercise; and build an equity action plan based on evidence-based practices. Advance CTE piloted the program in New Jersey, Minnesota and Florida and is working on a plan to make materials and trainings available to other members in 2021. This work was supported with funding from the Joyce Foundation and Bill & Melinda Gates Foundation.

“When we humbly launched our equity strategy just two years ago, we knew we were at the beginning of a long and difficult but necessary journey. While we don’t have all, or even most, of the answers, what we do have is our commitment to ending racial injustice. We will continue to lead with grace and urgency, with compassion and empathy, knowing we have more to learn and much, much more work to do.”

—Advance CTE Press Release, 6/4/2020
2020 was a year marked by significant challenges, and the devastation of the pandemic and the resulting economy will follow us in 2021. Through this adversity, Advance CTE will redouble our efforts to support our members, to lift up your accomplishments, to build awareness of and support for CTE, and to shine a light on the work we still need to attend to: closing opportunity gaps, diversifying our leadership and educator pipeline, ensuring that every program is high quality, and guiding our decisions with data. The challenge and work before us is significant. Advance CTE is optimistic and hopeful that in 2021, together, we will share a journey of progress marked by bold leadership and a fierce commitment to equity and quality.
Vision for the Future of CTE

In early 2021, Advance CTE will be releasing a new shared vision for the future of CTE, developed with input from the CTE Forward Summit contributors, the Summit co-convening and Advance CTE members. The new vision will focus on ensuring equitable opportunities and outcomes for each learner through and beyond the economic recovery and will attend to equity, quality, and the entire continuum of CTE learners. This bold and ambitious vision will require commitment from all levels of leaders and advocates, and Advance CTE is committed to working with partners and leaders from across the country to turn the vision into reality.

Modernizing the Career Clusters Framework

A major initiative for 2021 is Advancing the Framework: a state-led crowdsourcing initiative focused on modernizing the National Career Clusters Framework to be a modern construct that is reflective of the future of work and adaptable to the current and emerging needs of learners and the workplace. After extensive input from State Directors and other state CTE leaders, the Advance CTE Board and the Center to Advance CTE Board unanimously approved a purpose statement for the renewed Framework.
Advance CTE is planning a number of activities throughout 2021 to engage the CTE community and users of the Framework to inform this modernization effort. Ultimately, Advance CTE plans to share the modernized Framework in late 2022.

**Communicating About CTE With Key Stakeholders**

In 2020, Advance CTE conducted a series of focus groups and a national survey of learners, parents/guardians and employers to understand their perceptions of CTE. This work was based on research conducted in 2017, with a specific focus on how to communicate with Black and Latinx families to encourage them to enroll in CTE programs. This research and accompanying assets will be released in spring 2021 to assist states in their communications efforts.

**Committing to Another 100 Years of Service**

As we look toward not only the next year but also the next 100, Advance CTE is steadfast in our commitment to supporting our members in their tireless efforts to provide high-quality CTE for each learner in their state. In 2021, Advance CTE plans to support our members through releasing a number of resources and tools, hosting the virtual Spring Meeting featuring world-class professional development and networking opportunities, launching a robust series of online supports that connect CTE leaders to national experts and each other, and keeping the pulse on what CTE leaders need to know and the supports they need to receive to do their jobs best. It is a privilege and an honor to continue in this service.
IN 2021, ADVANCE CTE PLANS TO SUPPORT OUR MEMBERS THROUGH
RELEASING A NUMBER OF RESOURCES AND TOOLS, HOSTING THE VIRTUAL SPRING
MEETING FEATURING WORLD-CLASS PROFESSIONAL DEVELOPMENT AND
NETWORKING OPPORTUNITIES, LAUNCHING A ROBUST SERIES OF ONLINE
SUPPORTS THAT CONNECT CTE LEADERS TO NATIONAL EXPERTS AND
EACH OTHER, AND KEEPING THE PULSE ON WHAT CTE LEADERS NEED
TO KNOW AND THE SUPPORTS THEY NEED TO RECEIVE
TO DO THEIR JOBS BEST. IT IS A PRIVILEGE AND AN HONOR
TO CONTINUE IN THIS SERVICE.
