The four investments are working to expand access to and success through work-based learning in health care, transportation and logistics, and technology, as well as to build a data infrastructure to measure career readiness.

Detroit has committed to a district-wide expansion of career pathways across the city’s 22 high schools, a goal that is embedded in the district’s strategic plan. The district is also making connections with citywide efforts to expand work-based learning for youth.

The Dallas County Promise provides free college tuition, success coaches and wraparound supports to remove barriers to college and in-demand careers for Dallas County youth. In just two years, the number of participating seniors has nearly doubled to 16,500 and 98 percent have signed the Promise pledge.

CareerConnect is a district-wide initiative to redesign the K-12 experience to provide hands-on learning to students in both school-based and work-based settings. Over 12,600 middle and high school students participate in opportunities such as career-focused classes, mentorships, professional internships, and a three-year youth apprenticeship.

YouthForce NOLA is coordinating a city-wide effort to build career pathways that result in meaningful credential attainment for all high school students. They are strengthening pathways across the 28 open enrollment high schools and have launched the New Orleans Career Center to provide centralized career preparation.

CIE and MSC are bringing technical skills development and work-based learning directly to the Orange Farm community to enable low-income youth to become more employable. They have supported about 2,000 learners across four industries.

The Education Endowment Foundation is identifying and evaluating effective interventions to help youth ages 16 to 18 achieve a passing rate on the General Certificate of Secondary Education exams in English and mathematics, a current barrier to postsecondary school success.

Lend-a-Hand India is collaborating with the state government to integrate and scale vocational education in Maharashtra, the second most populous state in India. To date, they have provided work-based learning to over 1,000 students, engaging over 200 employers.

EDC is partnering with secondary schools and technical colleges in Indonesia, the Philippines, and Thailand to provide students with a hands-on bootcamp experience and work-based learning run by local information and communications technology industry partners. They have trained over 90 teachers and engaged over 400 employers.
